

Medicare Liability Waiver

May 4, 2010

Dear Patient:

This is an explanation of your chiropractic benefits under Medicare.

Our experience with Medicare has shown that extended chiropractic treatments are sometimes denied.

Based on a request by Medicare, we would like to notify you that these additional visits may NOT be covered by Medicare, and, therefore, you will be responsible for payment of services.

Medicare at this time only allows reimbursement for the chiropractic adjustment. They do NOT reimburse for x-rays taken or for services such as examinations, adjunctive therapies, orthopedic appliances, vitamins and orthotics.

We are very concerned about your health and our delivery of quality chiropractic care. I hope this note has helped to clear up any confusion about Medicare coverage. If you read and understand the above letter, sign below. If you did NOT understand the letter, ask your doctor to clarify before signing.

Sincerely,

Dr. Laura Heisler  
Chiropractor
